Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hosick et al (6032904).

Hosick et al shows a mechanical implement 22 with thruster pods at their ends, the extensions 42 are adjustable and they are added to the main structure. The thrusters are rotatable.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3-5,7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hosick et al in view of Barskey et al (5765780).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the satellite control of Hosick et al with a more accurate determination of the center of mass as taught by Barskey et al (see col 3 lines 20-23).

1. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Blount (4582191).

Blount show a satellite with a parent body 19 and mechanical implements 18 with thruster pods A at the ends there of that have fixed thrusters.

Drawings

1. The drawings have been approved.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
